

For A/C Piping

SC Hanging Band Men Guard

Pipe Condensation Prevention Series!
Safe and Secure Installation with Men Guard

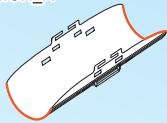

Feature 4:
Secure Covered Piping Installation

Using the openings at the four corners, it is also possible to attach using a bundling band (Insulok).

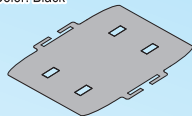

Feature 1:
Improved "MGH_R"

The improved "MGH_R" is easier to install.

"MGH_R"

"MGH_BK"
Color: Black

Feature 3:
Strong Support with an Overall Length of 200mm

The 200mm length provides secure support for thermal insulation.

Feature 2:

Strong Hold

The one-touch installation clip tie creates a strong-holding temporary joint for preventing misalignment and detachment. It can be used for all hinge type, kit type, lantern type, and hanging type products.

Example hinge type hanging band

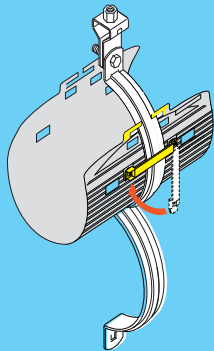

Example lantern type hanging VP band

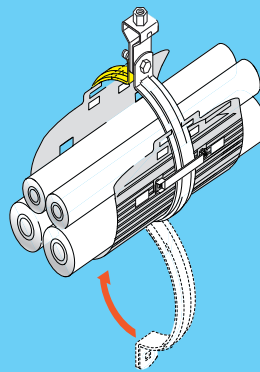

Installation Process

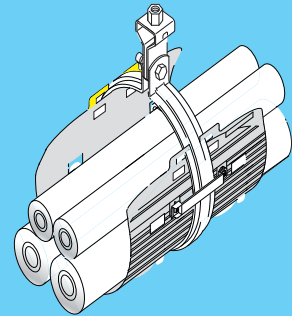

- (1) Hook it around the band.
- (2) Affix the clip tie around the band.

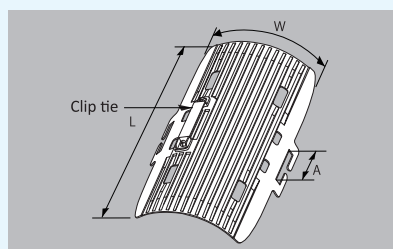

- (3) Lay the pipes and then close the band.

- (4) Hook the other side to the band to complete installation.

MGH_R/MGH_BK SC Hanging Band Men Guard

- This product supports A/C and refrigerant pipes by increasing the area that supports the thermal insulation so that the jacketing and insulation do not get smashed.
- Made of polypropylene.
- ▲ To attach pipes, use the openings at the four corners and a bundling band, etc.
- ▲ This product is for indoor use only.
- ▲ Lock using a clip tie in order to prevent detachment.
- The number in the parentheses for quantity indicates the quantity in the pouch.

Model No.	W	L	A	Compatible Bands	Quantity	Delivery Date Confirmation
