

These words were determined by Gakuzo Takahashi, who was the founder of the predecessor company of Showa Corporation CO., LTD, when he established the company in 1954.

They came from the purpose for "Social contribution through 'Harmony' based on mutual respect and trust for each other"

We, Showa Corporation Co., LTD, will profoundly take over its founder's will, and continuously provide profits to our stakeholders such as shareholders, customers and employees.

#### Greetings

## To "connect" 100-year company

Showa Corporation has been doing business mainly in sale for heat insulation products and in insulation work for 60 years.

Since its establishment, under our motto with a spirit of "Harmony", Showa Corporation has experienced turbulent time together with its three business divisions (the engineering division, the sales division and the production division) which brought us here today.

In order to response to customers' requests and changes in the environment, our successive business owners and employees have gained their experiences as experts in the field. From now on, we will engage in being more "proactive" rather than "just meet customer's requests" in order to reach at 100-year-old enterprise as our passing point in future. Recently, the social environmental changes accelerate more and more. As a result, customers' requests have been more diversified.

Even though it might include uncertainty in the business world today, there is no progress without a strong commitment and a challenge.

We believe that there is an ideal company image ahead of our challenges.

Under our company's motto, "Business establishment is the harmony between man and nature", we consider our mission is that our engineering division, sales division and production division will continuously engage in social contribution with our partner companies and customers through "Harmony' based on mutual respect and trust for each other".

Everyone in the company as one, we will make further efforts to become a promising company.

President Masami Fuji

## Refined skills support the future of energy.

#### **Description of Business**

Including thermal insulation work in key industries, we do design, construction and supervise for environmental equipment facilities such as chemicals, petroleum, electricity, pharmaceuticals, food, paper and other important industries.

We have abundant experiences for thermal insulation • duct work in many work sites in Japan, especially, in the field of sanitary air conditioning construction and district heating and cooling (DHC) in urban renewal projects. With world class techniques, in all aspects of design, construction and supervision, we meet our customers' needs.

#### **Business Items**

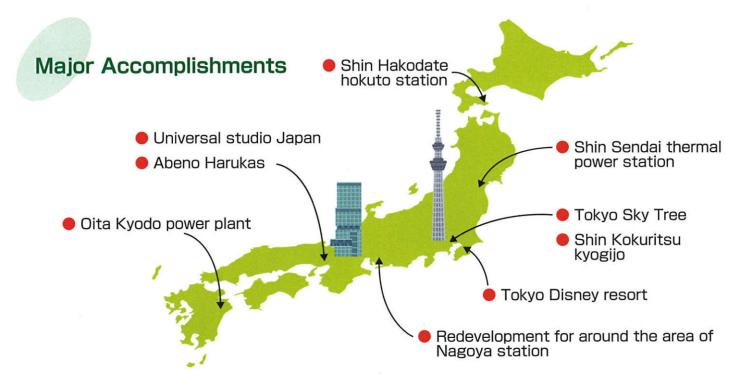

- Design/Construction/Supervision
- Insulation operation for Heat retention/Cooling/Heat proofing/ Freeze prevention/Fire prevention/
- Furnace installation/ Sound proofing operation/ Sound insulation / Vibration absorption
- Water proofing and anti- corrosion operations for Water proofing/ Acid proofing/ Alkaline proofing/ Oil proofing/Chemical proofing
- Equipment installation for clean rooms/ panels/plumbing/ air ducts interior work for sound absorption/ Sound insulation/ Fireproof coating/
- Dew condensation prevention in buildings and factories
- Interior work for Glass wool/ Rock Wool/ Urethane Application of resin on flooring and all types of paint application
- A set of various services for scaffolding and construction of all of the above operations.

#### **Fields of Construction**

- Environmental processing facilities
- Food plants
- Building air-conditioning and plumbing facilities
- District heating and cooling facilities
- Electricity/Chemical/Pharmaceutical plants
- Petroleum/Paper plants

### Together with Everyone

#### **Description of Business**

As a specialist trading company of insulation materials and plumbing parts, our sales division supplies thermal insulation pipe supports (Insulation Sleeper), brackets, insulation materials and air-conditioning related parts.

We actively propose products which meet customer needs such as global warming countermeasure, heat loss prevention and energy-saving etc., based on our abundant product lineup including in-house products and our more than a half century proven result.

#### **Products · Distribution System**

We are working to establish a distribution system in order to meet diversified nationwide customers' demands by setting up a distribution center in Shinsuna Koto-ward Tokyo.

#### **Oversea Expansion**

We are working to establish sale channels in new areas by utilizing our long-time know-how which we acquired in our domestic businesses.

By cooperating with local agencies and utilizing the network system, we are conducting closer communication and smooth transaction in South East Asia region.

# Our diversified product line

## In-house products

Our in-house products created by using new materials and technologies based on work-sites' voices attract favorable comment from our customers.

#### Insulation sleeper

Thermal insulation pipe support for Cold/hot water·refrigerant·LNG pipes etc.

Our insulation sleeper can be used in wide range from very cold temperature to high temperature, and it prevents condensation and heat loss at its supporting area.

#### Brackets for A/C piping

These products support A/C pipes such as coated copper pipes, drain pipes etc. By using Men Guard for pipe contacting portion, it prevents crushing coating materials.

#### Pipe supports

Enable to use in many kinds of pipes, and easy to install.

#### Showa's own products

# up meets customer needs!

### **Products**

We supply a wide range of products such as in-house products, general plumbing materials, deodorizer etc.

Especially, we are able to offer as a total proposal including pipes, thermal insulating materials, supports and anti-vibration brackets.

#### A/C related materials

#### Thermal insulating materials

#### Secondary materials

#### Deodorizer

#### **Items**

- Thermal insulating materials such as Glass wool Rock wool etc. and secondary materials.
- Thermal insulating materials such as polyethylene foam Polystyrene foam etc. and secondary materials.
- Exterior materials, pipes, fittings, valves etc., plumbing materials.
- Housing equipment such as Deodorizers.
- Air conditioning components for Air-conditioners, ducts etc.

## Faithful in Quality · Cost · Delivery time

#### **Description of Business**

This Division consist of three departments.

Gifu Factory as our production base, Production Technology Department develops products for the market which usher in customers' needs, and Procurement department supplies market needing products from manufacturing subcontractors, we are working on not only increasing product lineup for existing business but also expanding new businesses. In order to increase customers' satisfaction levels, we keep making an effort to improve our quality-cost-delivery time.

#### **Production item**

Insulation sleeper

Thermal insulating pipe supports combine thermal insulation performance and high strength.
Custom-made products are orderable.

Pipe supports

#### Gifu factory

As a pioneer of thermal insulating pipe supports, we produce insulation sleepers.

Having acquired the international standard of ISO9001, we supply reliable quality products to make sure our customers can use our products safely.

ISO 9001

生産技術部
岐阜工場取得

製品/サービスの範囲:配管用断熱支持具、 配管用支持金具の設計及び製造

#### **Production Technology Department**

Utilizing the network with our procurement department, it develops new products which customer needs are directly reflected.
By doing adjustment operations with our manufacturing subcontractors for its mass production, we are always pursuing products that make our customers more satisfy.

#### **Procurement Department**

Mainly, procuring products from domestic and oversea manufacturing subcontractors as well as controlling products' qualities.

We make sure that all factories can equally produce high quality products.

We continuously receive firm trust from our customers by providing careful quality checks even after our procurement.
